

Horse Feeders by Weldy (page 1 of 2)

Our Weldy line of horse feeders is rugged and economical. For our full-line of horse equipment see our Handi-Klasp PDF catalog. Click on item for more information.

Horse Feeders

Features a 5" trough. A 2" turned in top edge gives extra strength and helps prevent feed waste. Hay that is pulled out of the rack falls into the feed trough and is not wasted.

4 X 6 Feeder

4 X 4 Feeder

4 X 8 Feeder

4 X 4 covered feeder

Specifications

Model	Bunk Side Depth	Width	Feeder Height	Overall Height	Length	Wt.
4'x 4'	5"	48"	36"	72"	48"	170#
4'x 6'	5"	48"	36"	72"	72"	230#
4'x 8'	5"	48"	36"	72"	96"	310#

Stall Feeders

These stall feeders have a rounded bottom and 5" deep feed bunk. Great for one to three animals. They have eyelets in upper back for easy hanging in stall. They accommodate several sheaths of hay at a time. Built heavy to last in the typical Weldy fashion. Good for horses, cattle, calves, and sheep.

Round Horse Feeders

Heavy Duty steel tubing 30" hay saver panel 14 gauge steel. The U design of the feed saver rack allows easy access to the feed and helps prevent feed waste. With this design no top rail is needed thus eliminating the horses rubbing top of their manes.

Weldy's Round Horse Feeder comes in many sizes. One piece or 2 hinged semicircles depending on size.

JR4U - JR6U - JR7U Horse Feeders

Rounded Bottom Horse Feed Bunk

Features a deep side and rounded bottom which gives large capacity. A 2" turned in top edge gives added strength and helps prevent feed wastage. A heavy center brace ties the feeder together and full depth steel ends add to the feeders life and strength. The U design of the feed saver rack allows easy access to the feed and helps prevent feed waste. With this design no top rail is needed thus eliminating the horses rubbing top of their manes.
